

CLAIMS

What is claimed is:

1. A refrigerator comprising:

a main body having at least one refrigerating compartment;

a door to open and close an opening of the refrigerating compartment;

a water dispenser provided on the door to supply drink water;

a drawer provided inside the refrigerating compartment; and

a filter assembly disposed behind the drawer to filtrate water supplied to the water dispenser.

2. The refrigerator according to claim 1, wherein the filter assembly is mounted on a rear surface of the refrigerating compartment to be provided between a rear surface of the drawer and the rear surface of the refrigerating compartment when the drawer is accommodated in the refrigerating compartment.

3. The refrigerator according to claim 1, further comprising a water tank provided behind the drawer together with the filter assembly to contain the water filtrated by the filter assembly.

4. The refrigerator according to claim 3, wherein the rear surface of the drawer comprises a transparent area

that is made of transparent material and through which the filter assembly can be seen and a non-transparent area that is made of non-transparent material and through which the water tank cannot be seen.

5. The refrigerator according to claim 2, further comprising a water tank provided behind the drawer together with the filter assembly to contain the water filtrated by the filter assembly.

6. The refrigerator according to claim 5, wherein the rear surface of the drawer comprises a transparent area that is made of transparent material and through which the filter assembly can be seen and a non-transparent area that is made of non-transparent material and through which the water tank cannot be seen.
